SHAFT SINKING TO START SOON AT TON. DIVIDE

Steady development marks the activities so much in evidence at the Tonopah Divide property in the Divide district. While it was expected that shaft sinking would be resumed during the past week from the 1300 level, the cutting of the north and south stations has not yet been completed, but this task will probably be sufficiently advanced in a couple of days to permit of this most important work again being undertaken.

The principal development outside of the station work on the 1300 level is being centered on the 200 and 1000 levels, and while nothing officially has been given out concerning the results that are forthcoming, it is nevertheless a fact that a good tonnage of ore is being broken, which finds its way to the Belmont mill in Tonopah.

The official statement just issued for the seven-day period ending on Wednesday, February 8, follows:
West drift 230 advanced 7.2 feet; 207 intermediate west drift advanced 18 feet; 1001 drift advanced 21.5 feet; 230 north crosscut advanced 20.5 feet; 1300 north station driven 22 feet; 1300 south station driven 8 feet, making a total of 97.2 feet of underground work.

BEN HUR READY TO START LARGE DEVELOPMENT

The Ben Hur "Divide" Mining company, which entered into an agreement with the Keystone Divide Mining company, whereby operations will be prosecuted jointly through the shaft, has work well under way and machine drills will be brought into use today. Laying of track from the 200 station of the shaft workings in the drift, which has a length to the east of 251 feet, has been completed, and announcement has been made that the drift will be extended for some distance. In the face of this drift a fine-looking vein is exposed, and while the values only average around \$6 a ton, it is anticipated that some important developments will take place within the near future. It is proposed to sink the shaft, having a present depth of 435 feet, to the 500 level, but the drift on the 200 level will first receive attention.

The Ben Hur company has secured a three-year lease on the Junior Divide holdings, which lie in the acknowledged rich mineral zone of the Divide district, making a compact group of claims lying adjacent to the Tonopah Divide.

MRS. SARAH BELISLE DIES FROM INJURIES

Tonopah people will be shocked to learn of the death of Mrs. Sarah Belisle, sister of George Lewis, formerly engaged in business here, which occurred in a hospital at Long Beach, California, on Wednesday morning. This was considered a splendid high mark for this period of the year and the shipment was the result of the cleanup at the big milling plant for the last half of January.

During the week ending on Monday, February 6, a shipment of 30 bars of bullion was made, which covered the cleanup of the Desert mill at Millers for the last half of January, and which had an estimated value of \$60,000. (By Associated Press.)
LONDON, Feb. 10.—It was announced in the house of commons today that Premier Lloyd George had notified Michael Collins, head of the Irish provisional government, that the kidnappings in Ireland showed the necessity for British troops in Ulster. It was also announced that the northern parliament had been assured that the number of British troops would be increased to any extent necessary for the protection of the inhabitants.

The situation created by the kidnappings in Ulster today continued to bear a grave aspect. The northern Irish government had not up to this afternoon received any intimation of release of prisoners taken in recent raids and has no authentic information as to their whereabouts.

An article in the Daily Telegraph remarks that if the Ulster raids were not planned with the connivance of the provisional government, it is obvious that much of the material which was passed to it by the British has reached hands unfriendly to Michael Collins and his colleagues. It adds that there are many signs that certain local commandants of the Irish republican army who supposedly supported Collins, have thrown in their lot with De Valera. After further intimations as to the growing power of the republican extremists, the writer says: "The gunmen are supreme, and if there is an early general election in southern Ireland competent authorities believe the gun will decide the issue in favor of the Republican party."

ILLITERACY IN POLITICS GRAVE RUSSIAN CRIME

(By Associated Press.)
MOSCOW, Feb. 10.—Political illiteracy is a worse crime than bigamy in soviet Russia. Capital's errors are painfully, instantaneously and unequivocally cured by bolshevik courts, but ignorance of bolshevik laws is punished by sentence to courses in communist schools organized to enlighten those untaught in the ways of the soviet republic.
Alimony has not yet come into fashion in Russia. Prior to the communist ideal nobody had any such theoretical, and everybody worked and was supported by the state. With the reversion to capitalist ways and the recognition of the rights of personal property divorce proceedings may soon be tinged by Mammon.
